3. Financial investments

Trading securities

Investments are classified as trading securities when held for the purpose of buying and selling for profit.

NOTES TO SELECTED FINANCIAL STATEMENTS

As at September 30, 2026

Trading securities are recorded in accounting books at cost. The original cost of trading securities is determined according to the fair value of payments at the time the transaction occurs plus costs related to the transaction of purchasing trading securities.

The time to record trading securities is the time the Company has ownership, specifically as follows:

- For listed securities: recorded at the time of order matching (T+0)
- For listed securities: recorded at the time of order matching (T+0).
- For unlisted securities: recorded at the time of official ownership according to the provisions of law.

Interest, dividends and profits of periods before trading securities are purchased are accounted for as a decrease in the value of those trading securities. Interest, dividends and profits of periods after trading securities are purchased are recorded as financial revenue. Dividends received in shares are only tracked by the number of additional shares, the value of shares received/recorded at par value is not recorded.

Exchanged shares are determined at fair value at the exchange date. The fair value of the shares is determined as follows:

- For shares of listed companies, the fair value of the shares is the closing price listed on the stock market at the exchange date. In case the stock market is not trading on the exchange date, the fair value of the stock is the closing price of the previous trading session adjacent to the exchange

- For unlisted shares traded on UPCOM, the fair value of the shares is the closing trading price on UPCOM at the exchange date. In case the UPCOM exchange date is not traded, the fair value of the stock is the closing price of the previous trading session adjacent to the exchange date.

- For other unlisted shares, the fair value of the shares is the price agreed upon by the parties according to the contract or the book value at the time of exchange.

Provision for devaluation of trading securities is made for each type of security that is traded on the market and has a market price lower than the original price. Determining the fair value of trading securities listed on the stock market or traded on the UPCOM floor, the fair value of the securities is the closing price at the end of the accounting period. In case at the end of the accounting period the stock market or UPCOM floor is not trading, the fair value of the securities is the closing price of the previous trading session adjacent to the end of the accounting period.

Increases and decreases in provisions for devaluation of trading securities that need to be appropriated at the end of the accounting period are recorded in financial expenses.

4. Accounts receivable

Receivables are presented at book value less provisions for doubtful debts

The classification of receivables as customer receivables and other receivables is done according to the following principles:

- Customer receivables reflect commercial receivables arising from purchase-sale transactions between the Company and buyers who are independent units of the Company, including receivables on proceeds from export sales entrusted to other units
- Other receivables reflect non-commercial receivables, not related to purchase and sale transactions.

Provisions for doubtful debts are established for each receivable based on the aging of overdue debts or the anticipated level of losses that may occur, specifically as follows:

- For overdue receivables:
 - 30% of the value for receivables overdue from over 6 months to under 1 year.
 - 50% of the value for receivables overdue from 1 year to under 2 years.
 - 70% of the value for receivables overdue from 2 years to under 3 years.
 - 100% of the value for receivables overdue for 3 years or more.
- For receivables that are not yet overdue but are difficult to collect: provisions should be made based on the anticipated level of losses.

Increases, decreases in the balance of provisions for doubtful debts must be recorded at the end of the accounting period and recognized as management expenses.

5. Inventory

Inventory is recorded at the lower of cost and net realizable value.

The cost of inventory is determined as follows:

- Raw materials and goods: include the purchase cost and other directly related costs incurred to acquire the inventory at its current location and condition.
- Finished goods: include the costs of raw materials, direct labor, and overhead costs that are allocated based on normal operating levels/costs of land use, as well as direct costs and related overhead costs incurred during the investment in the construction of real estate finished products.
- Work in progress: includes direct material costs, direct labor, and overhead production costs.

Net realizable value is the estimated selling price of the inventory in the normal course of production and business, less estimated costs to complete and estimated costs necessary to sell them.

Giá trị hàng tồn kho được tính theo phương pháp nhập trước, xuất trước và được hạch toán theo phương pháp kê khai thường xuyên.

Inventory value is calculated using the first-in, first-out method and is accounted for using the perpetual inventory method. A provision for inventory write-down is established for each inventory item whose cost exceeds its net realizable value. For services in progress, the provision for write-down is calculated for each type of service with a separate price level. Increases or decreases in the balance of the inventory write-down provision must be recognized in the cost of goods sold at the end of the accounting period.

6. Prepaid Expenses

Prepaid expenses include actual costs that have been incurred but are related to the results of business operations over multiple accounting periods. The Company's prepaid expenses include the following costs:

Tools and equipment that have been put into use are allocated to expenses using the straight-line method over a period not exceeding 36 months.

Repair Costs for Fixed

Assets One-time repair costs for fixed assets with significant value are allocated to expenses using the straight-line method over 36 months.

7. Operating Leases assets

Leases are classified as operating leases if the majority of the risks and benefits associated with ownership of the asset belong to the lessor.

Operating lease expenses are recognized as expenses using the straight-line method over the lease term, regardless of the payment method for the lease.

NOTES TO SELECTED FINANCIAL STATEMENTS

As at September 30, 2026

8. Fixed Tangible Assets

Fixed tangible assets are presented at their original cost less accumulated depreciation. The original cost of fixed tangible assets includes all expenses that the Company incurs to acquire the fixed assets up to the point when the assets are ready for use. Subsequent expenses can only be added to the original cost of fixed tangible assets if these expenses are certain to increase future economic benefits from the use of those assets. Expenses that do not meet this condition are recognized as production and business expenses in the period incurred.

When fixed tangible assets are sold or liquidated, the original cost and accumulated depreciation are removed, and any gains or losses from the liquidation are recognized as income or expenses in the period.

Fixed tangible assets are depreciated using the straight-line method based on the estimated useful life in accordance with the guidelines set forth in Circular 45/2014/TT-BTC dated 25/4/2014, by the Ministry of Finance. The depreciation periods for various types of fixed tangible assets are as follows:

Type of fixed asset

Buildings and structures

Machinery and equipment

Transportation and transmission vehicles

9. Intangible Fixed Assets

Intangible fixed assets are presented at their original cost less accumulated depreciation.

The original cost of intangible fixed assets includes all expenses that the Company incurs to acquire the fixed assets up to the point when the assets are ready for use. Expenses related to intangible fixed assets incurred after initial recognition are recorded as production and business expenses for the period unless these expenses are associated with a specific intangible fixed asset and enhance the economic benefits from these assets.

When an intangible fixed asset is sold or disposed of, the original cost and accumulated depreciation are written off, and any gains or losses from the disposal are recognized in income or expenses for the period.

The intangible fixed assets of the Company include:

Land use rights

Land use rights encompass all actual costs that the Company has incurred directly related to the land used, including: payments made to obtain land use rights, costs for compensation, site clearance, land leveling, and registration fees... Land use rights without a specified term are not subject to depreciation.

10. Accounts Payable and Accrued Expenses

Accounts payable and accrued expenses are recognized for amounts owed in the future related to goods and services received. Accrued expenses are recognized based on reasonable estimates of the amounts payable.

The classification of payables is made according to the following principles:

· Payables to suppliers reflect trade payables arising from transactions for the purchase of goods, services, and assets, where the supplier is an independent entity from the Company, including payables incurred during imports through a consignee

· Accrued expenses reflect amounts payable for goods and services received from suppliers or provided to buyers but not yet paid due to the absence of invoices or insufficient accounting documentation, as well as payables to employees for vacation pay and accrued production and business expenses.

· Other payables reflect non-trade payables that are not related to the purchase, sale, or provision of goods and services.

11. Payable provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, and the settlement of this obligation is expected to result in an outflow of economic benefits, with the value of the obligation being reliably estimated.

If the time value of money is material, provisions will be determined by discounting the future cash outflows required to settle the obligation at a pre-tax discount rate, reflecting current market assessments of the time value of money and the specific risks of the obligation. The increase in the provision balance due to the passage of time is recognized as a financial expense.

12. Equity

Owner's Contributions capital

Owner's contributions are recognized based on the actual capital contributed by shareholders

Share premium

Share premium is recognized based on the difference between the issue price and the par value of shares at the initial issuance, additional issuances, the difference between the reissue price and the book value of treasury shares, and the equity component of convertible bonds upon maturity. Direct costs related to the additional issuance of shares and the reissuance of treasury shares are deducted from the share premium

Other capital of the owner

Equity Other equity is formed from retained earnings, asset revaluation, and the remaining value between the fair value of donated or sponsored assets after deducting any applicable taxes (if any) related to these assets.

Treasury Shares

When repurchasing shares issued by the Company, the payment amount, including related transaction costs, is recognized as treasury shares and reflected as a deduction in equity. Upon reissuance, the difference between the reissue price and the book value of treasury shares is recorded under the "Share Premium" item.

13. Profit Distribution

The after-tax profit of the enterprise is distributed to shareholders after allocating funds according to the Company's Charter as well as legal regulations and has been approved by the General Meeting of Shareholders.

NOTES TO SELECTED FINANCIAL STATEMENTS

As at September 30, 2026

The distribution of profits to shareholders takes into account non-cash items within the undistributed after-tax profit that may affect cash flow and the ability to pay dividends, such as gains from the revaluation of contributed assets, gains from the revaluation of monetary items, financial instruments, and other non-cash items.

Dividends are recognized as liabilities when approved by the General Meeting of Shareholders.

14. Revenue and Income Recognition

Sales revenue, finished products

Revenue from the sale of goods and finished products is recognized when all of the following conditions are met:

- The company has transferred most of the risks and rewards associated with ownership of the product or goods to the buyer.
- The company no longer retains control over the goods as an owner or has the right to manage the goods.
- Revenue is determined to be relatively certain.
- The company has received or will receive economic benefits from the sales transaction.
- The costs related to the sales transaction can be determined.

Revenue from Service Provision

Revenue from service provision transactions is recognized when the outcome of the transaction can be reliably determined. In cases where services are performed over multiple periods, revenue is recognized in the period based on the results of the work completed as of the end of the accounting period. The outcome of the service provision transaction is determined when all of the following conditions are met:

- Revenue is relatively certain.
- There is a likelihood of obtaining economic benefits from the service provision transaction.
- The portion of the work completed as of the end of the accounting period can be determined
- The costs incurred for the transaction and the costs to complete the service provision transaction can be determined.

Revenue from Real Estate Sales

Revenue from the sale of real estate in which the Company is the investor is recognized when all of the following conditions are simultaneously met:

- The real estate has been fully completed and delivered to the buyer, and the company has transferred the risks and rewards associated with ownership of the real estate to the buyer.
- The company no longer retains control over the real estate as the owner or has the ability to manage the real estate.
- Revenue is relatively certain.
- The company has received or will receive economic benefits from the real estate sale transaction.
- The costs related to the real estate sale transaction can be determined

Construction Revenue

When the results of contract performance can be reliably estimated:

- For construction contracts that specify payment to the contractor based on the planned schedule, revenue and costs related to the contract are recognized in accordance with the portion of work completed as determined by the Company on the date of the end of the accounting period.
- For construction contracts that specify payment to the contractor based on the actual volume of work performed, revenue and costs related to the contract are recognized in accordance with the portion of work completed that has been confirmed by the customer and reflected on the issued invoice.

Increases or decreases in construction volume, compensation amounts, and other revenues are only recognized when agreed upon with the customer.

When the results of construction contract performance cannot be reliably estimated:

- Revenue is only recognized equivalent to the costs incurred for the contract, provided that reimbursement is relatively certain.
- Costs of the contract are only recognized as expenses when they have been incurred.

The difference between the total cumulative revenue recognized for the construction contract and the cumulative amount recorded on the invoice for scheduled payments of the contract is recognized as receivables or payables according to the scheduled progress of the construction contracts.

Interest

Interest is recognized on an accrual basis, determined based on the balances of deposit accounts and the actual interest rates for each period.

Dividends and Profit Distribution

Dividends and profit distributions are recognized when the Company is entitled to receive dividends or profits from its investments. Dividends received in the form of shares are only tracked by the number of additional shares, without recognizing the value of the shares received.

15. Revenue Deductions

Revenue deductions are amounts adjusted to reduce total revenue for the year, including trade discounts, sales discounts, and returns of goods sold.

16. Cost of Goods Sold

The cost of goods sold is the total cost of goods, investment properties, the production cost of finished products sold, and direct costs of the volume of services provided, along with other costs included in the cost of goods sold or adjustments to reduce the cost of goods sold.

17. Financial Expenses

Financial expenses are costs related to financial activities, including expenses or losses related to financial investments and borrowing, losses from the transfer of short-term securities, transaction costs for selling securities, and provisions for the decline in the value of trading securities.

18. Selling Expenses and Administrative Expenses

Selling expenses and administrative expenses encompass all costs incurred in the process of selling products, goods, providing services, and the general management costs of the company.

NOTES TO SELECTED FINANCIAL STATEMENTS

As at September 30, 2026

19. Borrowing Costs

Borrowing costs include interest on loans and other expenses directly related to the borrowings.

Borrowing costs are recognized as expenses when incurred. In cases where borrowing costs are directly related to the construction investment or production of assets under construction that require a sufficiently long period (over 12 months) to be put into use for their intended purpose or sold, these borrowing costs are capitalized. For specific loans used for the construction of fixed assets or investment properties, interest is capitalized even if the construction period is less than 12 months.

Income generated from the temporary investment of borrowed funds is deducted from the carrying amount of the related assets. For general borrowings that are used for the purpose of construction investment or production of assets under construction, the capitalized borrowing costs are determined based on the capitalization rate relative to the weighted average accumulated costs incurred for the basic construction investment or production of those assets. The capitalization rate is calculated based on the weighted average interest rate of loans that are outstanding during the period, excluding specific loans intended for the formation of a particular asset.

20. Corporate Income Tax

Corporate income tax expenses include current corporate income tax and deferred corporate income tax.

Current income tax:

Current income tax is the tax calculated based on taxable income. The taxable income differs from accounting profit due to adjustments for temporary differences between tax and accounting, non-deductible expenses, as well as adjustments for non-taxable income and carried forward Deferred income tax:

Deferred income tax is the amount of corporate income tax that will be payable or refundable due to temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the tax base. Deferred income tax liabilities are recognized for all taxable temporary differences. Deferred income tax assets are only recognized when it is probable that there will be sufficient taxable profits in the future to utilize these deductible temporary differences.

The carrying amount of deferred income tax assets is reviewed at the end of the reporting period and will be reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow the benefit of some or all of the deferred income tax assets to be utilized. Deferred income tax assets that have not been previously recognized are reassessed at the end of the reporting period and are recognized when it is probable that there will be sufficient taxable profits to utilize these unrecognized deferred income tax assets.

Deferred income tax assets and deferred income tax liabilities are determined based on the tax rates expected to apply to the year in which the asset is recovered or the liability is settled, using the tax rates that are enacted at the end of the reporting period. Deferred income tax is recognized in the income statement and is only directly credited to equity when the tax relates to items that are credited directly to equity.

Deferred income tax assets and deferred income tax liabilities must be offset when:

- The company has the legal right to offset current income tax assets against current income tax liabilities; and
- Deferred income tax assets and deferred income tax liabilities related to corporate income tax are managed by the same tax authority:
- For the same taxable entity; or
- The company intends to settle current income tax liabilities and current income tax assets on a net basis or recover assets simultaneously with the settlement of liabilities in each future period when significant amounts of deferred income tax liabilities or deferred income tax assets are settled or recovered.

21. Segment Reporting

· A business segment is a distinguishable component that engages in the production or provision of products and services and has risks and economic benefits that are different from those of other business segments.

· A geographical segment is a distinguishable component that engages in the production or provision of products and services within a specific economic environment and has risks and economic benefits that are different from those of business segments in other economic environments.

Related Parties

Parties are considered related if one party has the ability to control or has significant influence over the other party in making decisions regarding financial policies and operations. Parties are also regarded as related if they are under common control or have significant common influence.

In considering the relationship of related parties, the nature of the relationship is given more importance than the legal form.

V. IMPORTANT EVENTS OR TRANSACTIONS DURING THE ACCOUNTING PERIOD:

1. Seasonality or cyclicity of business activities during the period:
2. The nature and value of items affecting assets, liabilities, equity, net income, or cash flows that are considered unusual due to their nature, size, or impact: none
3. Fluctuations in equity and cumulative value as of the date of the Q3/2026 Financial Report:
Fluctuations in business equity and quarters:

“Re: Explanation of Financial Statements
Quarter 3/2026”

Da Nang, October 28, 2026

To: - State Securities Commission
- Hanoi Stock Exchange

1. Company Name: Danang Housing Development Construction Joint Stock Company
2. Stock code: NDX
3. Head office address: 31 Nui Thanh Street, Hoa Cuong Ward, Da Nang City
4. Phone: 0236.3631 157
5. Information disclosure person: Ms. Ho Thi Tra Huong, position: Company Secretary
6. Information disclosure content:
 - 6.1 Financial report for quarter 3 of 2026 includes: statement of financial position, business results, cash flow statements, and notes to the financial statements.
 - 6.2 Explanation content: explanation of difference > 10% of net profit compared to the same period last year:

Unit: VND

No	Items	Quarter 3 2026	Quarter 3 2025	% Increase/ Decrease
1	Total Revenue	53,283,861,410	18,931,523,456	181.46%
2	Profit before tax	6,110,035,863	2,342,531,805	160.83%
3	Profit after corporate income tax	4,875,646,716	1,872,213,644	160.42%

Explanation:

In the third quarter of 2026, Da Nang Housing Development and Construction Joint Stock Company achieved revenue of 53.28 billion VND and after-tax profit of 4.87 billion VND. Compared to the same period last year, after-tax profit increased due to efficient concrete production and construction activities.
